

FLOOD WATERS MAY RISE

When submerged in water, the VLP® takes action and seals the open vent line. As the water recedes, gravity allows the vent line to re-open.

RISE

VENT LINES STAY DRY

Water and debris are kept out of crucial vent lines, saving natural gas pressure regulators from damage and corrosion.

VENT LINE PROTECTOR (VLP®)

Patent Pending

FEATURES

- Rugged Finish
- Stainless Steel Screen and Baffle Plates Prevent Vent Line Contamination
- Tested and Approved by the Gas Technology Institute (GTI)
- Lightweight Aluminum Housing
- Normally Open, Positive Close
- Integral Float Guide Zones for the Perfect Seal
- Replaceable Polymer Float with High Grade Silicone Dry Seal
- Engineered for Use in Zones Susceptible to Flooding
- Made in the USA
